PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience in Core Java, Advanced Java, SQL, and front-end technologies. Currently pursuing Java Full Stack training at JSpiders, where I am strengthening my skills in application development, database management, and software design. A quick learner with strong analytical and problem-solving abilities, eager to build impactful software and grow in a collaborative development environment.

EDUCATION

Atria Institute of Technology 2022 – 2026 B.E. in Computer Science and Design Engineering | CGPA: 7 / 10

Reva University, Bengaluru 2020 – 2022 (Class XII) | 65%

TECHNICAL SKILLS

Programming: Core Java, Advanced Java, Python, JavaScript, SQL.

Frontend : HTML5, CSS3, React, Tailwind CSS

Backend : Spring Boot, Spring MVC, REST APIs

Tools: Git, GitHub, Eclipse, VS Code, Postman, Maven, Docker, Redis, IntelliJ IDEA, MySQL Workbench

CS Fundamentals: OOP, DBMS, Operating Systems, Computer Networks.

INTERNSHIP & TRAINING

Java Full Stack Trainee Jan 2026 – Present JSPIDERS, Rajajinagar | Bangalore

- Practicing structured debugging of Java programs — tracing exception stack traces, identifying root causes, and applying fixes across OOP and Collections-based codebases.
- Writing and testing SQL queries (joins, subqueries, constraints) to diagnose and validate database-level issues — directly applicable to software support diagnostics.
- Solving logic problems to strengthen analytical thinking for issue resolution and root cause analysis.

Web Development Intern Sep 2025 – Dec 2025 Zaalima Development | Remote

- Completed certified training in front-end development; responsible for structured web page design and debugging layout inconsistencies.
- Communicated technical issue resolutions in written form, documenting steps and outcomes for each implementation task.

Full Stack Web Developer Intern Oct 2023 – Nov 2023 TekkyBench | Remote

- Developed static and responsive web pages using HTML5 and CSS3; tested pages across browsers and reported functional issues.

PROJECTS

E-Banking System Apr 2026 – May 2026

- Developed a secure full-stack E-Banking application using Spring Boot and React.js. Implemented JWT-based authentication, OTP verification using Redis, and role-based access control with Spring Security. Integrated Razorpay payment gateway for online deposits and developed features such as account management, fund transfers, transaction history, and admin account approval. Built REST APIs for frontend-backend communication and used MySQL for efficient data management documentation practices.

Emotion-Based Music Recommendation System Sep 2024 – Dec 2024

- Developed an AI-powered music recommendation system that detects users' emotions from facial expressions using a fine-tuned ResNet50 model (FER dataset, 82% accuracy). Integrated GRAD-CAM for explainable AI, enabling transparent prediction insights. Implemented real-time emotion detection and personalized playlist generation based on valence-arousal mapping, user history, and contextual factors. Backend built with Node.js/TypeScript and model training in Python, ensuring efficient processing for live user interactions.

HOBBIES & INTERESTS

- Practicing coding problems and improving problem solving skills.
- Exploring backend development concepts and system design basics.
- Fitness Training.
